DETAILED ACTION

Response to Amendment

Applicant's Amendment filed 11/08/05 has been received and entered. Regarding claim 8, since claim 8 corresponds to a non-elected species (see Response to Election/Restriction filed Jul. 20, 2005), therefore is withdrawn from consideration. Claims 1-7 remain pending in the current application.

Claim Rejections - 35 USC § 103

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishiyama et al. (US 2002/0140888) in view of Jones et al. (US 6124907) further in view of Gunning, III et al. (US 5638197).

With respect to claim 1 (Amended): Nishiyama et al. disclose in Figure 1 a liquid crystal display apparatus comprising:

a first transparent substrate (element 134);

a second transparent substrate (element 111) facing the first transparent substrate;

a liquid crystal layer (element 120) interposed between the first and the second substrates; and

a retardation layer (element 116) interposed between the first and second transparent substrates, and compensating phase difference of light that passes through the liquid crystal layer.

Application/Control Number: 10/725,595

Art Unit: 2871

Nishiyama et al. fail to specifically disclose that the retardation layer has a function of a biaxial film.

However, Jones et al. disclose in Column 9 lines 62 and Figure 1 a liquid crystal display apparatus comprising a retardation layer (element 17) having a function of a biaxial film interposed between the first and second transparent substrate.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to construct a liquid crystal apparatus as taught by Nishiyama et al. wherein the retardation layer has a function of a biaxial film as taught by Jones et al., since biaxial retardation films exhibit better display contrast and wider viewing angles, as taught by Gunning, III et al. (Abstract).

As to claims 2-4: Nishiyama et al. disclose all of the limitations set forth in claim 1, but fail to specifically disclose the composition of the retardation layer.

However, Jones et al. teach the use of internal retarder/polarizer corresponding to Figures 1 and 9, wherein the retardation layer comprises a cholesteric liquid crystal polymer including reactive mesogen mixture (Column 12, lines 39-52).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to construct a liquid crystal display apparatus as taught by Nishiyama et al. wherein the retardation layer has the properties as taught by Jones et al., since Jones et al. teach that having such retarder/polarizer helps in improving contrast ratios in the display due to the minimization of the de-polarizing of color filters (Abstract).

As to claims 5-7: Nishiyama et al. further disclose in Figure 1 that the second transparent substrate further comprises a color filter layer (element 113), a protection layer (element 114)

Application/Control Number: 10/725,595

Art Unit: 2871

disposed on the color filter layer, a common electrode layer (element 115) disposed on the protection layer, and the retardation layer (element 116) is disposed on the common electrode layer.

Response to Arguments

Applicant's arguments with respect to all claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
